Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 11, the language “said second mantle layer” lacks a proper antecedent basis. In claim 12, the language “said composite core” lacks a proper antecedent basis. In claim 13, the language “said softball” lacks a proper antecedent basis.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Talarico et al. Regarding claims 1-5 and 14, Talarico et al. discloses a game ball comprising a central core (2), a first mantle (4) and a cover (8). Note column 2, lines 1-18 stating that the core and mantle are urethane compositions formed by mixing a polyol with isocyanate.

Regarding claims 6 and 15, Talarico et al. also teach a thin wound layer (6) surrounding the first mantle (4) and the core (2).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-13 and 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Talarico et al. Regarding claims 8 and 16, it would have been obvious to one of ordinary skill in the art to supply an additional mantle layer to the ball of Talarico et al. in order to further alter the hardness/softness of the ball. The addition of another layer of a polyurethane material is seen as a mere duplication of parts and their associated functions.

Regarding claims 9-13 and 17-20, the recited dimensions and rebound characteristics for the ball are considered to be obvious given the teachings of Talarico et al. and the lack of a teaching for the criticality of the claimed dimensions and characteristics by a new and unexpected result. Attention is directed to claim 1 of Talarico et al. reciting various dimensions for a 9" ball. It would have been obvious to one of ordinary skill in the art to enlarge these dimensions in order to construct a 12" ball that closely resembles a conventional softball.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
